WEATHER OUTLOOK FOR NEXT SEVEN DAYS (From 8th to 14th September 2018)

Highlights of the weather during the past week (From 1st to 7th September 2018)

During the last week, Southwest Monsoon remained weak over Telangana state with large deficit by -83% over the state as a whole. In the absence of any major weather system over the state, light to moderate isolated rainfall occurred during most days of the week.

State seasonal rainfall upto 07th September 2018 is 584.8mm against normal 626.1mm, being deficit by -7%. Out of 584 Mandals: 0.5% of Mandals (3) received large excess, 13% of Mandals (78) received excess, 46% of Mandals (269) received normal, 39% of Mandals (230) received deficit and 0.7% of Mandals (4) received large deficit rainfall.

The highest rainfall of 64.2mm recorded at Kerameri (Komrambhem-Asifabad) on 01st September during the week.

(Note: large deficit rainfall (-60 to -99% deviation from normal), **deficit** (-20 to -59% deviation), **normal** (-19 to +19% deviation) and **excess** (+20% to +59% deviation) and **large excess** (+60% or more)).

Forecast for next week (From 8th to 14th September 2018)

The present Monsoon conditions over the state indicate, the ongoing subdued rainfall activity over the state is expected to continue for the next one week. Light to moderate isolated rainfall is expected to occur during most days of the week. Overall rainfall activity is likely to be below normal during the next one week.
